

Like fingerprints, tooth prints are unique to each person. This is why dental records can be used to identify people. Everyone's tongue print is different, too.

The Great Wisdom Tooth®

Majestic Molar®

Right-handed people chew food on the right side of their mouths. Left-handed people chew food on the left side.

The Biscupid Kid®

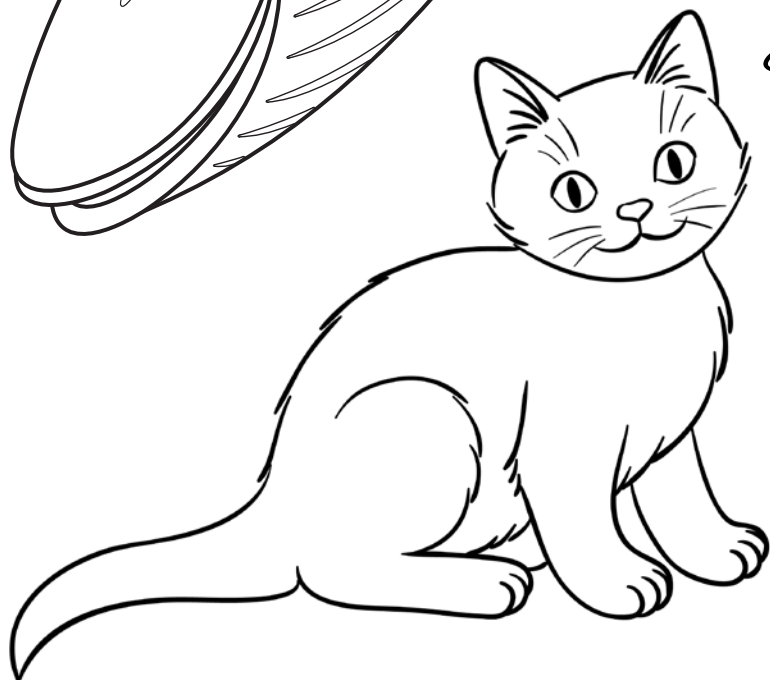

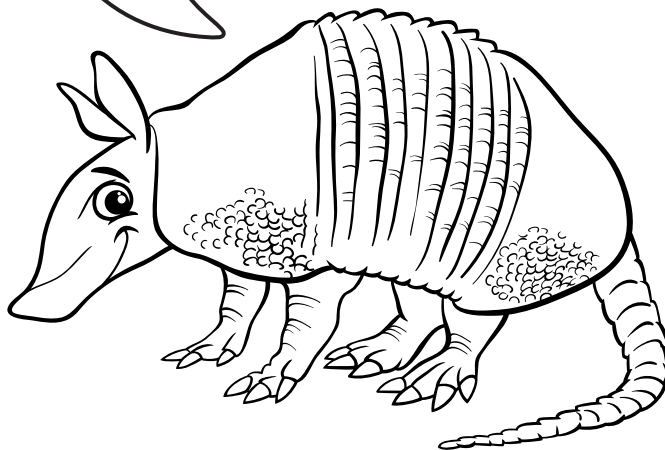

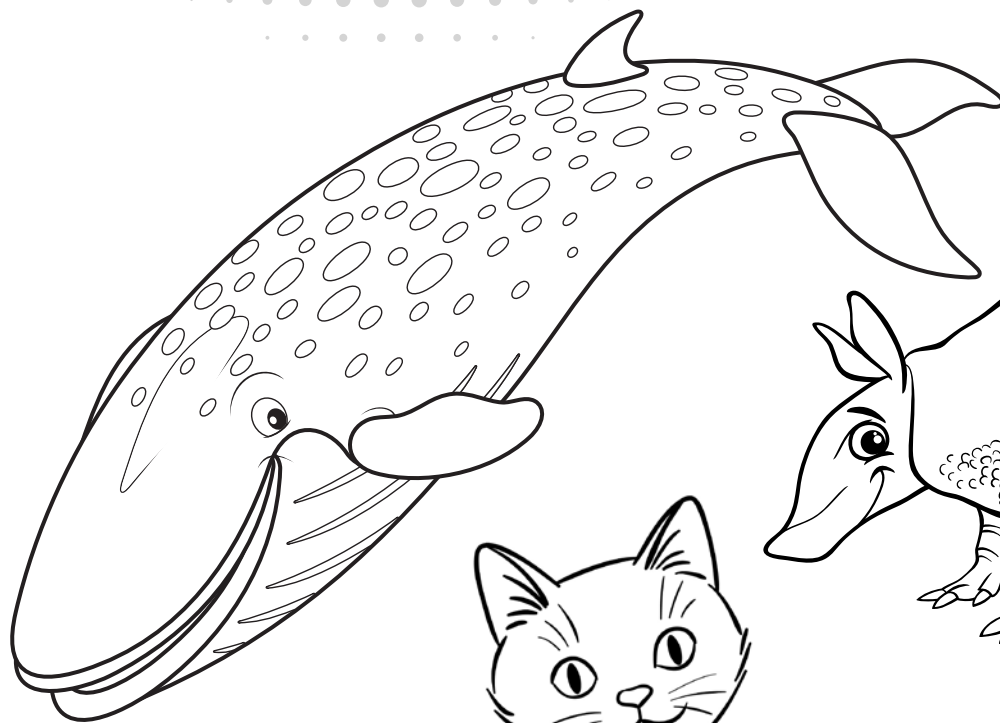

Gently brush your teeth and gums at least twice a day for at least two minutes each time. Brush with a soft-bristle toothbrush using a circular motion. Floss to clean all the places between your teeth.

Did you know? Dogs have 42 teeth. Cats have 30 teeth. Armadillos have 104 teeth. A tiny snail can have over 25,000 teeth. And even though the blue whale is the largest mammal on earth, it has no teeth.

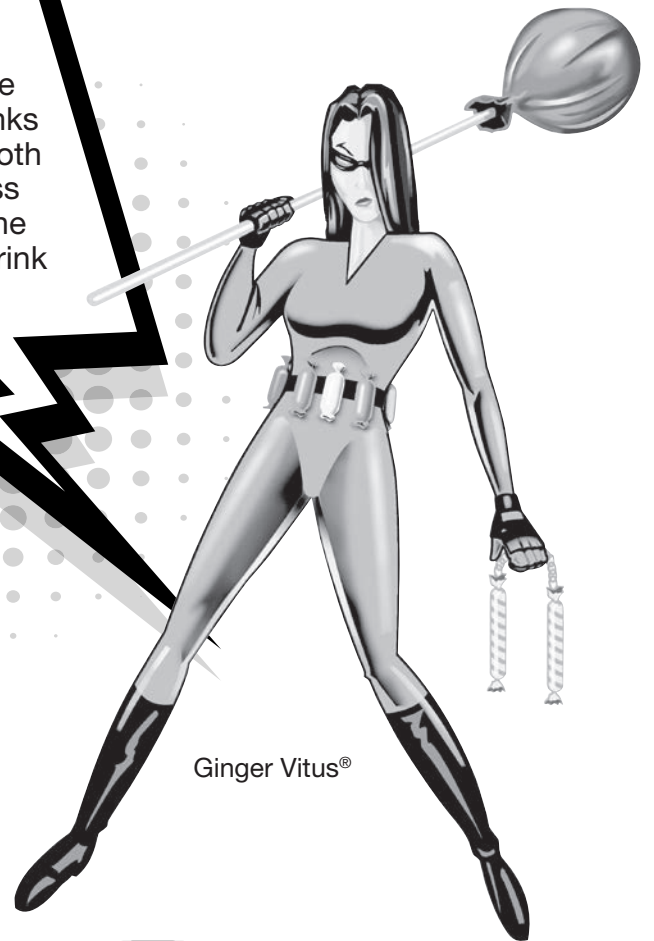

Canine®

People who drink 3 or more glasses of pop or sports drinks each day have 62% more tooth decay, fillings and tooth loss because of all the sugar. (The Mighty Tooth Brigade says drink fresh water instead!)
